

March 2015

Monthly Drilling Report

Release Date: 8 April 2015

Senex Energy Limited (ASX:SXY) has drilled eleven wells of its FY15 drilling program in the South Australian Cooper Basin, with no additional drilling undertaken during March.

Senex intends to spud the twelfth well of its FY15 program at Dunoon-3 in PRL 16¹ (Senex 100% and operator) in the southern Cooper Basin during April. Consistent with the strategy announced earlier this year of deferring higher risk exploration spend and focusing the Company's program on development and production enhancing activities, Dunoon-3 is a low risk near-field oil exploration target located on the currently producing Dunoon Ridge.

ABOUT SENEX ENERGY

Senex is an S&P/ASX 200 exploration and production company with significant oil and gas acreage in Australia's Cooper and Surat Basins. Senex currently produces over 1 million barrels of oil each year, and has successfully diversified its business with the commencement of gas sales in 2014 and initiation of the Western Surat Gas Project.

¹ PRL 16 is a Petroleum Retention License from PEL 113
