

May 2015

Monthly Drilling Report

Release Date: 3 June 2015

Senex Energy Limited (ASX:SXY) has completed its drilling program for the 2015 financial year, with no additional wells spudded during May. The Company has drilled 13 wells in the South Australian Cooper Basin during FY15, adjusted from the original program of 26 wells. The drilling program was adjusted in response to the anticipated decrease in full year revenues as a result of the lower oil price environment.

Senex is currently finalising its forward work program for FY16 across its portfolio of growth projects, and will continue its disciplined approach to capital allocation. A market update will be provided on or before the release of the 2015 annual results on 25 August 2015.

ABOUT SENEX ENERGY

Senex is an S&P/ASX 200 exploration and production company with significant oil and gas acreage in Australia's Cooper and Surat Basins. Senex currently produces over 1 million barrels of oil each year, and has successfully diversified its business with the commencement of gas sales in 2014 and initiation of the Western Surat Gas Project.
